

New from Charles Darwin University Press...

Future Options for North Australia identifies ten major drivers that will shape the north: population, social function, property rights, Commonwealth policy, the global economy, resource use, oil futures, climate change, invasive organisms and technological innovation. For each they identify the risks, uncertainties and the extent to which they can be controlled by the people of the north. Then they describe seven possible futures: chronic underdevelopment, degeneration, a northern ricebowl, an industrial powerhouse, environment first, an Indigenous community Utopia and dynamic urbanization. These are not predictions. They are scenarios to make readers think and realize that the decisions being made today will have a profound influence in the future. Whereas for the rest of the world, the future has largely been set by unplanned development and the irrevocable contingencies of history, northern Australia can be moulded by deliberate and considered choices. Our generation has the opportunity and frightening responsibility to make those choices.
